

ESOC Commercial Truck, Inc.

Changing Downtime Into Road Time

# SERIES 875-MF OIL EXCHANGE

The SERIES 875 was designed to change oil in your shop or mounted on a service truck for off-site oil changes.

The SERIES 875 only requires connections to 125 PSI compressed air, fresh oil under pressure at 300 PSI, and a waste oil tank.

Using ESOC's patented oil change process the SERIES 875 will purge the waste oil from the oil filters and passages as it removes the waste oil from the sump. It will then refill the engine with fresh metered oil under pressure providing a pre-lube to the system.

- Fully Pneumatic System
- Complete 40 quart oil change in about 15 minutes
- Integrated metered pistol grip dispenses in quarts or liters
- Patented "Spill-Free" quick connect fittings ensure a clean "No Mess" operation
