

ESOC Commercial Truck, Inc.
Revolutionary Fluid Exchange Technology

SERIES 900 OIL EXCHANGER

The SERIES 900 is an electronically controlled oil change system that uses audible sounds to tell the operator when a function is complete. Touch screen allows for easy operator input.

The SERIES 900 requires up to 240 volts a/c power, 125 PSI shop air, fresh oil supply under pressure at 300 PSI and a connection to a waste tank.

Using ESOC's patented oil change process the SERIES 900 will purge the waste oil from the oil filters and passages as it removes the waste oil from the sump. It will then refill the engine with fresh oil under pressure providing a pre-lube to the system.

- Instant Oil Pressure
- Electronic Controller
 - Audible alerts when functions are complete
- Patented "Spill-Free" quick connect fittings ensure a clean "No Mess" operation
